

Project name:Implement Client Script & UI Policy (Incident)

Milestone 1 :Create UI Policy on incident

Solution

I logged in to the **ServiceNow instance** with the required administrative/configuration access and navigated to **System UI → UI Policies**.

I clicked **New** and created a new UI Policy with the following configuration:

- **Name:** High Impact Control
- **Table:** Incident
- **Active:** True
- **Condition:** Impact is 1 – **High**

This condition ensures that the UI Policy is triggered whenever an Incident has an **Impact** value of **1 – High**.

After creating the UI Policy, I configured the **UI Policy Action** for the **Assignment group** field. I enabled the **Mandatory** option so that the Assignment group field becomes mandatory when the Incident impact is High.

I also enabled **Reverse if false**. This ensures that when the Impact condition is no longer satisfied, the mandatory setting applied by the UI Policy is automatically reversed.

After reviewing all the configurations, I clicked **Submit** to save the UI Policy successfully.

The **High Impact Control** UI Policy was created successfully, and the **Assignment group** field is configured to become mandatory for high-impact Incidents.

Screenshot:

I have attached the screenshot below as evidence of the completed **High Impact Control UI Policy** and its configuration.

The screenshot shows the ServiceNow 'UI Policy - New Record' configuration page. The browser address bar indicates the URL is `dev435320.service-now.com/now/nav/ui/classic/params/target/sys_ui_policy.do%3Fsys_id%3D-1%26sys_is_list%3Dtrue%26sys_target%3Dsys_ui_policy%26sysparm_checked_items%3D%26sysparm...`. The page title is 'UI Policy - New Record'.

UI Policy Configuration Details:

- Table:** Incident [Incident]
- Application:** Global
- Active:** ☒
- * Short description:** : High Impact Control
- Order:** 100

When to Apply / Script Configuration:

- Conditions:** Add Filter Condition | Add OR Clause
- Condition 1:** Impact is 1 - High
- Logic:** AND (selected), OR, X
- Global:** ☒
- Reverse the effects of the UI policy actions when the Conditions evaluate to false:** ☒
- On load:** ☒
- Inherit:** ☐

Instructions:

- If selected, the UI Policy applies to all form views; otherwise the UI Policy is view-specific.
- Apply the UI policy actions when the form is loaded and when the user changes values on the form.
- Tables that extend the specified Table inherit this UI Policy.

The bottom of the screenshot shows a Windows taskbar with a search bar, application icons, and a system tray displaying '37°C Mostly sunny' and the time '01:57 PM 30-09-2026'.
