

UI policies change fields on a form based on a set of conditions. Use UI policies to show or hide fields, or to make fields mandatory or read-only based on these conditions. A UI policy specifies one or more actions to take when the policy is triggered. First, create the policy. Then add as many actions as necessary. UI policy actions are applied only if all of the following conditions are met:

- The UI Policy is **Active**
- The items in the **Conditions** field evaluate to true
- The field specified in the UI policy action is present on the specified form

Order 100

When to Apply Script

Conditions Add Filter Condition Add OR Clause

Impact is 1 - High AND OR

If selected, the UI Policy applies to all form views; otherwise the UI Policy is view-specific

Apply the UI policy actions when the form is loaded and when the user changes values on the form
